- Facilitates job placement in the United States and globally
- American Degree
- Transfer of credits (prior review)
- 100% Online Classes
- Flexible Schedule

Master in Education with Concentration in Digital Technologies

Duration of the program:

1 year and 4 months

Professional profile:

This program focuses on providing professional development to people who are working in positions that involve teaching and want to become experts in the use of educational technology and instructional designers using current technologies to their full potential.

Graduation profile:

This program offers a comprehensive curriculum for the professional development of educators of all levels who wish to design and apply technology in their own learning environments more effectively. Contents focus on constructive learning, curriculum development, integration and use of software and websites, application and design of digital instructional materials and the psychology of the classroom and the adaptation of technologies.

Possible jobs:

In educational institutions as teachers, administrators or academic coordinators.

Benefits:

This program is of high value for all professionals in the educational field, who, in addition to learning to use the most up-to-date and advanced technological tools, will be able to deepen their applied knowledge through the publication of their academic articles in Academic Networks, Scientific Journals and International Technological Platforms. The program will develop teachers' abilities to design their own educational materials using digital technologies and develop creative and innovative approaches to their work, as well as master the use of digital technologies to enhance practice, research, and professional and academic development.
